

You are invited to come learn more about SCP Training

Info sessions hosted by neuroCare with Caroline Stevenson & Associates

Suite 23, Building 7
49 Frenchs Forest Rd East

Monday, September 4
07.00 – 08.30pm

Friday, September 8
12.00 – 1.30pm

neuroCare is a brand of neuromodulation services now available at Caroline Stevenson & Associates. We are now one of the first clinics in Australia to offer SCP (Slow Cortical Potentials) Training, a type of Neurofeedback to train self-regulation and improve inattention and hyperactivity. This therapy is well-researched and proven effective for children and adults with ADHD.

We are inviting you to our seminar to speak with psychologist and SCP Training specialist, Susanne Mechtersheimer, who has been trained in Europe to deliver this therapy. You will also get a chance to speak with Dr. Caroline Stevenson who looks forward to sharing more information with you and answering your questions.

Please express your interest in joining either of the information seminars
